

Coming in September 2017 !!

Community Dental Care

2120 US Highway 14 East – Rochester

18 dental operatories
Comprehensive general dental services
Preventive education community programs

Serving 10,000 patients annually
35 new full-time professional jobs

Why is this new clinic needed?

- Patients at our current RCTC - Heintz Center clinic must wait **two months** for a dentist appointment and **seven months** for an oral hygiene appointment.
- Our patients are extremely high need — 96% are enrolled in Minnesota Health Care Programs (MHCP) or are uninsured. In 2014, 25% were **emergencies!**
- Many of our patients do not have a dental home; last year 49% of over 5,300 patients were **new** patients.
- There are close to 71,000 people in Olmsted and the six bordering counties eligible for oral health care through public programs. **Only 30%** had any dental/oral health care service in 2014.
- There are 10,500 Medicaid-eligible children in these counties; **only 43%** received any services in 2014.
- Access to oral health care for MHCP patients is decreasing. From 2012 – 2014, MHCP patients more than doubled in SE Minnesota, but claims went up by **only 8%**.

Join us in changing access to oral health care in Southeast Minnesota!
